EDUCATION

CUNY Hunter College

New York, NY

Bachelor of Arts in Computer Science, 3.42 GPA

Aug. 2022 – May 2025

Relevant Courses: Data Structures and Algorithms; Software Analysis and Design I, II, and III (C++), Discrete Structures, Operating Systems, Computer Theory, Computer Architecture I and II

TECHNICAL SKILLS

Languages: Swift/SwiftUI, Kotlin/Jetpack Compose, JavaScript, HTML/CSS/SCSS, Python, C++, SQL (MySQL), TypeScript

Technologies/Frameworks: Flask, ReactJS, Firebase, Bootstrap, Git, Jupyter Notebook

Libraries: pandas, NumPy, Matplotlib, AnimeJS, EmailJS

EXPERIENCE

Software Engineering Intern – Kotlin, Jetpack Compose

September 2024 - Present

Movement Vault

New York, NY

- Spearheaded the development of on-boarding screens and flows for the Movement Vault Android app, resulting in a 25% increase in new user retention through intuitive and user-friendly design.
- Designed and implemented a video player for workout content, dynamically fetching and displaying over 100 video resources using API integrations.
- Engineered responsive UI components optimized for various screen sizes, ensuring consistent design and functionality across devices.
- Debugged and optimized features, improving app performance and ensuring a seamless user experience.
- Conducted code reviews and partnered with backend developers to synchronize API integrations and resolve technical challenges.

Software Engineering Mentee

Sep. 2023 – Dec. 2023

Yext

New York, NY

- Collaborated closely with seasoned Software Engineers, gaining professional guidance and technical expertise.
- Participated in weekly workshops, fostering meaningful connections and enhancing technical skills.

PROJECTS

Fitting Room App (iOS) – Swift/SwiftUI, Firebase, CoreML

June 2024 – August 2024

- Developed an iOS app that allows users to upload pictures of their clothes to Firebase storage and visualize them on a dummy model using Apple CoreML for image processing.
- Implemented functionality to manage their wardrobe and an interactive outfit generator with randomization and locking capabilities.

To-Do List App (iOS) – Swift/SwiftUI, Firebase

June 2024

- Developed a to-do list app with user authentication using Firebase, allowing users to register, log in, and create to-do items with dates and times, storing data securely in Firebase Firestore.

Weather App (iOS) – Swift/SwiftUI, OpenWeather API

June 2024

- Developed an iOS weather application using Swift and SwiftUI, integrating the OpenWeather API to fetch real-time weather data based on user location.

Portfolio Website – ReactJS, JavaScript, SCSS, AnimeJS, EmailJS

May 2024 – June 2024

- Developed an interactive and responsive portfolio with advanced animations (SVG logo drawing, bouncing letters, moving stars, spinning 3D cube) and integrated email functionality for direct communication.

Avengers Careers – Python, Flask, MySQL, HTML/CSS

April 2024

- Built a dynamic job portal displaying openings from a MySQL database, with real-time updates for changes in job data and dynamic routing for applications, storing applicant information seamlessly back into the database.

RoosterTunes - Discord Music Bot – Python, Discord API

April 2024

- Developed a bot to stream YouTube audio in Discord voice channels, implementing commands for play, pause, resume, and stop, using asyncio for seamless asynchronous operations.
